

WIND ZONE SPEED CHART

The information provided below is for reference only and is based on the practices of 2001 AASHTO. For job specific requirements, provide your representative with the project's prevailing code.

GENERAL INFORMATION

1. Values are maximum - Mile speeds at 33ft (10m) above ground areas which include flat, open country, and grass plains.
2. Linear interpolation between wind speed contours is acceptable.
3. Alaska and/or special wind regions require caution in application of wind speed information.
4. Local codes may require wind speeds other than listed above.
5. Consult Techlight for more specific wind load data.
